Celebrating our 1st Anniversary

On July 25th, 2008, we celebrated our first year as the new owners of Mike's Clean Sweep Services. We deeply appreciate all of our customers who stayed with us through the transition and all of our new customers for giving us a chance! We are very grateful for our reliable hard-working employees that make everything possible. We also want to thank our founder, Mike Schad, who continues to be a great friend and mentor.

Now a Certified Woman-Owned Business Enterprise

We recently received our WBE certification from the Women's Business Enterprise National Council. We also received the WBE and SBE certification locally through the Central Certification Program (CERT) sponsored by the Cities of Minneapolis and St. Paul, along with Ramsey and Hennepin Counties.

Mike's GREEN Sweep Services

We are proud that the majority of our cleaning products and procedures have always met the standards for a "GREEN" cleaning program. We are trained, equipped and prepared to handle the requirements of your LEED® project with a Low Impact Cleaning Program. Please let us know if you have any specific cleaning requirements.

More than Construction Final Cleaning

We may be the "construction final cleaning experts" but we also provide many additional cleaning services. From sweeping and pressure washing underground parking garages to cleaning up after a major flour spill at a local food processing plant. We are also available for deep cleaning or Blitz cleaning for a special event.

Got Floors?

We clean and finish all types of flooring; VCT, linoleum, cork, rubber, carpet, ceramic/marble tile, or concrete. If it needs to be cleaned, stripped, sealed or finished we can help. Our truck mounted ProChem Legend Carpet Extractor can professionally steam clean almost any carpeted area, and now with our new American Lincoln riding auto-scrubber we can clean thousands of square feet of hard flooring quickly.

Safety Is No Accident

Since our inception, we have maintained a strong safety record. We now have an OSHA approved AWAIR Safety Program. All of our employees receive ongoing safety training and each foreman has his personal copy of the safety program and MSDS sheets at every job site. If you need a copy of our safety program or MSDS sheets for your files or to post at your job site, please let us know.
